- Under 1 cm thick !!
- Excellent impact and airborne reduction under Lino floors
- Linoroll is made from 100% recycled and sustainable materials
- Suitable for both concrete and timber floors
- Simple and easy installation
- Supplied in handy sized slabs
- Available from stock

## Description

The Lino Floor System combines a black recycled resilient rubber mat designed to reduce impact noise transmission when used under Lino and a layer of high mass rubber. These combined upgrade the sound insulation properties of your floor and work in all types of domestic properties.

The two main components are our (Syl) Linoroll - 5 for reducing the impact noise and 2 layers of our Soundproofing Mats to reduce the airborne sound. Combined they reduce both noise types very well.

*As the Linoroll is produced using recycled rubber, soiling of the hands and clothes may occur during handling so protective measures are advised. There may be a slight odour from the rubber but this should quickly dissipate once installed with the Lino on top.*

We have created this easy to order system for you but all the products can be purchased individually from other web pages on our site.

Supplied with the following products included;

- 1 x layer of (Syl) Linoroll 5 (10m x 1.25m x 5mm thick) per roll
- 2 x Layer of Soundproofing Mats - (1.8m x 1.2m x 2mm thick) per mat
- Special Spray Adhesive (15oz 426 gram cans)

The system is easy to fit with little D.I.Y experience and is simply laid directly on the floor. There is no need for a lino underlay as well as this product. Once ordered the products are despatched with full step by step install instructions.

Your area in m2	Linoroll - 5 Rolls	Soundproofing Mats (Enough for 2 layers)	Special Spray Adhesive
1	1	1	1
2	1	2	2
3	1	3	3
4	1	4	4
5	1	5	5
6	1	6	6
7	1	7	7
8	1	8	8
9	1	9	9
10	1	10	10
12.5	1	12	13

Work out the area of your floor then use our product selector, left, to work out how much you need.
