

BUDGET ACOUSTIC DOOR KIT - *An internal domestic noise solution*

Key Benefits

- Door seals comply with Part E Building regulations
- Provides a great reduction in noise through a doorway,
- Supplied with full instructions - easy to install
- Significantly reduces sound through the doorway
- All seals are easily cut to fit by you

Description

Designed for DIY installation, these sets comprise a 30 minute fire resistant acoustic door along with a full set of acoustic seals including the all important threshold seal as shown above. Door hinges and furniture would be supplied by others.

These acoustic door sets are designed to replace existing doors within the home using the existing door frame and now enable you to achieve a reasonable degree of soundproofing through doors at an affordable price.

What's in a kit?

1 x Acoustic Door leaf ready for painting (See sizes available below)

4 x 1m RP120 Self Adhesive Batwing Seals for the sides of the door frame (2 lengths for each side).

1 x 1m TES Threshold Seal (To be cut back by the customer)

1 x 1m CDS Threshold Contact Strip (To be cut back by the customer)

1 x Set of installation instructions

This acoustic door kit comes with everything you will need to replace a standard door and save the costly expense of a purpose made Acoustic Doorset & frame. They are also ideal if you wish to install a double door entry system into a studio or garage conversion into a studio.

Note! These door kits are for **internal use only**. They are not weather resistant so should not be used in external applications. If your looking for a particular type of acoustic seal not listed please contact us. We may be able to assist. Intumescent seals are also available if required. Let us know if these are required when ordering. They are available 15mm or 30mm wide.

Due to delivery restrictions, the kits are dispatched in two parts with the door sent separate to the acoustic seals. It is very important that you check the door for damage before signing for it because damaged doors signed for as received in good condition cannot be replaced.

Technical Specifications:

THICKNESS - 44mm, FIRE RATING - FD30 30 Minutes, MATERIAL - Plywood Faced ready for painting, Acoustic rating of door leaf is 30dB
