

# SCREENSORPTION - PLUS Sound absorbing office screens

## Key Benefits

- Freestanding, lightweight
- Lower priced
- Sound absorbing
- Wide variety of colours
- Available in several sizes

## Description

Screensorption-PLUS lightweight acoustic screens both free-standing and for desks have been produced to suit offices with internal noise problems. If the budget is limited these acoustic screens are a worthwhile alternative to the normal higher range Screensorption that we also supply. The screens will absorb noise on both sides and can be linked together to form a longer screen and corners. They are faced with an efficient sound absorbing fabric that is available in a wide variety of colours that can be viewed from the product page of our web site. Constructed with a hollow inner core and silver coloured PVC edges contributes to their lighter weight and so much easier to handle. These screens can be used to screen personnel from reverberated noise making open plan office environments and call centres better to work in with less stress for the personnel and making them more efficient. Flat silver coloured feet are supplied with every screen so that they can free stand on their own if required.

## Application

Screensorption-PLUS is a simple, easy to handle and install system of attaining effective noise control in any office type working environment. When used between close working personnel a much pleasanter and more efficient working environment is created. It is one of the simplest and effective means for sound control in any open plan office or call centre.

## Manufacture

Screensorption-PLUS acoustic screens are manufactured from hollow cored chipboard to enhance the sound absorption qualities and covered with a sound absorbing 3mm foam backed coloured fabric. The higher specification screens have 12mm of non-flammable sound absorbing foam.

## Appearance

A wide range of screen fabric colours are available from white through to black. The edging trims and feet are finished in silver but other colours and sizes can be available on request.

## Dimensions

Screens can be supplied in any size up to a maximum of 1800mm x 1600mm and 25mm or The . Other thicknesses may be available upon request.
