

SILVER FLOOR CAVITY SYSTEM

Key Benefits

- Means no increase in the floor height
- Offers great thermal and sound insulation.
- The Quilt is produced from 70% recycled materials
- Blocks out airborne sound as well as lead.
- Available from stock

Description

This Silver Floor Cavity System is designed to improve the sound insulation of timber suspended floors so is not suitable for concrete floors. It is particularly useful if any increase in the existing floor height is not desired and will help reduce airborne noise from above and below.

The system is also a very good prelude to further soundproofing that may be required on top of the floor to enhance the soundproofing properties of the insulated floor. This system **is unlikely** to reduce any footfall or impact sound that is made on the floor.

Your area in m ²	Sound-Blocker Membrane	SoundBlocker Quilt Plus

The products are installed as seen left

The system is supplied with the following products included;

- A layer of SoundBlocker Membrane (12m x 1.25m and 1.2mm thick) per roll
- 1 x Layer of SoundBlocker Quilt Plus (6m x 600mm wide) per roll

If you have experience of lifting floorboards then the system will be easy to fit otherwise a local handyman or second fix carpenter could undertake the work.

Once ordered the products are despatched with full step by step install instructions.

Work out the area of your floor then use our product selector, left, to see how much you need.
