

WHISPER FOAM - The water resistant sound absorber.

Key Benefits

- Excellent acoustic performance
- Lightweight, easy to cut and handle
- Fire rated to Din 4102 (Class B1)/UL94(class HF1)
- No hazardous mineral fibres
- Water resistant
- Transmission Loss 14dB RW

Description

Due to its lightweight construction and excellent fire resistance, Whisper Foam is a unique and highly efficient sound absorber that is unaffected by water, making it ideal for external use as well as acoustic enclosures and has a number of unique features.

The product produced from polyethylene foam has a number of fire resistant properties including Din 4102 (Class B1) and UL94(class HF1) making it ideal for installation into most acoustic enclosures such as marine, generators, compressors and automotive including commercial vehicles or any situation where moisture or humidity is present.

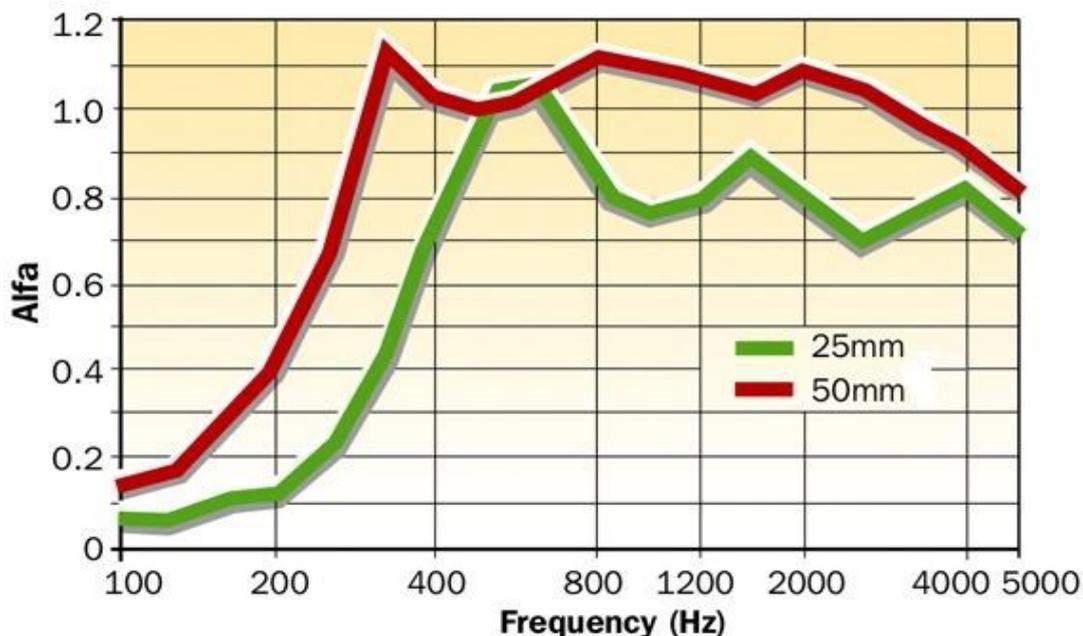

Sheet Size: Full Sheets: 2.4m x 1.2m
Half Sheets: 1.2m x 1.2m

Available in 25mm and 50mm thicknesses and with or without self-adhesive backing

Colour: Charcoal

Fire resistance: Din 4102 (Class B1)/ UL94(Class HF1)

Acoustic performance: Transmission Loss 14dB RW (50mm thick)
Sound Absorption: Class A (50mm thick)
Sound Absorption Average (SAA): 0.98
